

DILLIDUR 550

Wear resistant steel

Material data sheet, edition October 2023¹

DILLIDUR 550 is a wear resistant steel with a nominal hardness of 550 HBW in delivery condition ex works. DILLIDUR 550 is preferentially used by the customers where very high resistance to wear is required. Examples of application are extremely stressed parts in earth moving machines, conveyors, crushers and recycling plants.

In spite of their high tensile properties, DILLIDUR steels are not intended for safety relevant components. For this purpose, high strength steels DILLIMAX are available.

Product description

Designation and range of application

DILLIDUR 550 can be delivered in thicknesses from 10 mm to 100 mm (0.4 in. to 4 in.)² and in the following maximum widths:

Plate thickness t [mm] (in.)	Width [mm] (in.)
10 (0.4) ≤ t ≤ 15 (0.6)	2 000 (79)
15 (0.6) < t ≤ 100 (4)	3 300 (130)

Chemical composition

For the ladle analysis, the following maximum values in % are applicable:

C	Si	Mn	P	S	Mo	Ni	Cu	Cr	V	Nb	B
0.37	0.70	1.60	0.020	0.005	0.60	1.40	0.30	1.50	0.08	0.05	0.005

The steel is fully killed and fine grain treated.

¹ The current version of this material data sheet can be also found on www.dillinger.de.

² The approximately converted values in brackets are for information only.

Indicative values for the carbon equivalent:

Plate thickness [mm] (in.)	51 (2)	100 (4)
CEV ^a	0.60	0.75
CET ^b	0.47	0.49

^a $CEV = C + Mn/6 + (Cr+Mo+V)/5 + (Cu+Ni)/15$

^b $CET = C + (Mn+Mo)/10 + (Cr+Cu)/20 + Ni/40$

Delivery condition

The plates are water quenched or water quenched and tempered under controlled conditions.

Mechanical properties in the delivery condition

Hardness

Plate thickness t [mm] (in.)	Surface hardness in Brinell at room temperature [HBW]
t ≤ 51 (2)	520 - 580
51 (2) < t ≤ 100 (4)	500 - 580

Charpy-V impact test on longitudinal specimens (indicative values for 20 mm plate thickness)

Charpy impact energy: 25 J at -40 °C (-40 °F)³.

Testing

Brinell hardness testing acc. to EN ISO 6506-01 or Leeb hardness testing acc. to EN ISO 16859-01 on a ground surface in general 0.5 mm - 2.0 mm below the sheet surface.

Brinell surface hardness tested once per heat and 40 t.

Unless otherwise agreed, the test results are documented in an inspection certificate 3.1 in accordance with EN 10204.

Identification of plates

Unless otherwise agreed the marking is carried out via steel stamps with at least the following information:

- steel grade (DILLIDUR 550)
- heat number
- number of mother plate and individual plate
- the manufacturer's symbol
- inspection representative's sign

³ The approximately converted values in brackets are for information only.

Processing

The entire processing and application techniques are of fundamental importance to the reliability of the products made from this steel. The user should ensure that his design, construction and processing methods are aligned with the material, correspond to the state of the art that the fabricator has to comply with and are suitable for the intended use. The customer is responsible for the selection of the material. The recommendations in accordance with EN 1011-2 (Welding) and CEN/TR 10347 (Forming) as well as recommendations regarding job safety in accordance with national rules should be observed while considering the higher strength and hardenability.

The steel can be heated to about 175 °C (347 °F) without any substantial drop in hardness (200 °C (392 °F) for short period).

For further processing recommendations, please refer to the corresponding processing information.

General technical delivery requirements

Unless otherwise agreed, the general technical delivery requirements in accordance with EN 10021 apply.

Tolerances

Unless otherwise agreed, the tolerances will be in accordance with EN 10029, with class A for thickness.

Surface quality

Unless otherwise agreed, the specifications will be in accordance with EN 10163-2, class A2.

General note

If special requirements, which are not covered in this material data sheet, are to be met by the steel due to its intended use or processing, these requirements are to be agreed before placing the order.

The information in this data sheet is a product description. This data sheet is updated at irregular intervals.
